

How to reduce inspection costs

Notify prior to departure and arrival

- Notify the inspector at the Entry Inspection Post at least 3 days in advance of estimated arrival and inspection times.

Avoid the penalty inspection rates

- Avoid scheduling inspections on weekends or public holidays.
- Avoid scheduling inspections to begin prior to 6.00 am or to continue after 6.00 pm.

At the Entry Inspection Point

- Ensure all entry documentation is complete and legible including full details of ownership and address of the properties of origin and destination.

On your property

- Have stock yarded and ready for inspection before the inspector arrives.
- Have adequate staff to ensure a constant flow of animals during inspection.

Private Veterinary Practitioners

- Private veterinarians conduct liver fluke tests and treatments for horses, camelids and deer. It is your choice as to whether they do so for other species.
- Ensure all documentation declaring the completion of all prescribed treatments, tests and inspections is complete.

SERVICE FEES AND CHARGES FOR LIVESTOCK INSPECTIONS 2008/09

Why charge for inspections?

- So taxpayers' (public) money is not used to subsidise inspection services for livestock importers.
- To enable an all-year-round, on-call service at the Entry Inspection Points.
- To maintain the quarantine inspection facilities at Kalgoorlie, Halls Creek and Kununurra.

The Animal Health Laboratory charge for the Faecal Egg Sedimentation Test for liver fluke eggs is:

	Unit Fee	GST	Total Fee
Case fee	\$17.27	\$1.73	\$19.00
Each sample in consignment	\$70.00	\$7.00	\$77.00

NB. These tests may be carried out by the private laboratory VETPATH.

- There will always be a small risk of live animals introducing disease so consider importing semen or embryos.

Guidelines for charging

1. The Service fee for a shipment covers preparation and communication costs and is shared between consignments.
2. The Service fee for a consignment covers provision and explanation of the Health Certificate and applies to each consignment ONLY when there is more than one consignment in a shipment.

3. Inspection is charged per 15 minutes or part thereof for an inspector's time conducting inspection, supervision, sample collection and packaging, freighting and associated post-inspection paperwork and communications.
4. Normal working hours are between 6.00 am and 6.00 pm on weekdays.
5. Penalty rates apply for inspections before 6.00 am or after 6.00 pm and on weekends and public holidays. There is a minimum charge for 'call out' on a weekend or public holiday.
6. A travel charge applies for each 25 km or part thereof directly between the place of inspection and the nearest Department of Agriculture and Food office. Penalty rates apply for travel outside of normal hours.
7. The travel charge to an Entry Inspection Point is one unit of 25 km for each journey to be shared between consignments in a shipment.
8. Inspection of washed-down vehicles attracts a time-based inspection fee and, if requiring a separate journey, a travel charge.
9. Export Health Certificates, Approval Notices for movement to the Liver Fluke Restricted Area and Verification of tests and treatments required to release animals from quarantine are charged for on a time basis.
10. * Prices are GST inclusive where applicable. GST is not charged for inspections or treatments required under regulation.
