

# Perennial pastures for Western Australia

Geoff Moore, Paul Sanford and Tim Wiley

“Perennial pastures for Western Australia” is designed to become an essential tool for producers in agricultural areas, farm advisers, agribusiness and students.

Its expert editorial team has picked the brains of more than 20 leading pasture agronomists and scientists to provide everything you need to know – and more – about perennial pastures in WA.

In 250 pages it covers all perennial options from herbaceous legumes to temperate and sub-tropical grasses, herbs, fodder shrubs and saltland pastures.

The comprehensive descriptions, information on current and potential uses, establishment tips, soil and climate requirements, management and other details are also accompanied by great colour photographs.
