

Queensland fruit fly (Qfly) Eradication Program

Is a Green Waste Collection happening in your street?

To the residents of Como, Karawara, Kensington and South Perth

Queensland fruit fly (Qfly) has been detected in Como, and a Quarantine Area has been declared. Quarantine means **restrictions on moving fruit and vegetables, and these also apply to green waste for verge collection:**

- Strip all fruit and vegetables from the branches planned for verge collection.
- Remove and dispose of any fruit and vegetables by freezing for 24 hours, cooking or securing them in a sealed, heavy-duty black plastic bag which is placed in direct sunlight for three days.
- **ONLY AFTER THREE DAYS** can solarised treated bags be placed in the rubbish bin.

All other plant material must be disposed of by following the City of South Perth instructions for verge collection of green waste.

By following these rules you are helping to prevent further spread of Qfly in your area.

You are in a Quarantine Area

STOP

Queensland fruit fly
detected in your area

Restrictions apply to
movement and disposal of
home-grown fruit and vegetables
