How to report a pest using the MyPestGuide™ (MPG) Reporter app

1. Open the app on your mobile device

Select the MPG™ Reporter icon

The splash screen will appear

2. Create a report

Create a report by selecting the ‘+’ symbol or the ‘menu’ button on your screen

3. Take a photo

Once ‘Create report’ is selected the ‘Report’ screen will open

Press the camera icon to start

You can now take or attach up to four photos

4. Location for Google maps viewing

Make sure your location is turned on, so your report is visible on Google maps

5. Enter details about your observation

Select ‘MyPestGuide’ from the picklist

Complete observation details

If you collect a sample please tick ‘I am sending a sample’. Select the ‘refresh’ symbol to generate a sample ID and write this on your container.

Tick ‘I agree to share my report’

Click ‘Continue’

6. Confirm your contact details

Select your state location

Enter your email address and mobile number

If you created a sample ID, it will display here, along with DPIRD’s mailing details for sending your sample.

Click ‘Send’!

Any reports you make using the app will be stored within the app for reference, along with our response.
