Primary Industries and
Regional Development

Pantry Blitz 2022

Thank you for registering!

Please follow these instructions on how to set up your Trapper® MAX Glue Trap and make reports using the MyPestGuide® Reporter app.

Please set up your trap and make your initial report by 18 March 2022.

Download the MyPestGuide® Reporter app

1. Open your relevant app store.
2. Type 'mypestguide reporter' in the search bar.
3. Install the MyPestGuide® Reporter app onto your device.

Assemble trap and make an initial report

1. Fold the trap along each fold line, making a crease then unfold the trap.
2. Carefully remove the plastic film by grasping the card edge and pulling the film off in one quick movement. Avoid touching the glue as it's super sticky!
3. Using scissors, cut out the code above and open the lure packet. Using tweezers, remove the lure from the packet and press the lure down in the centre of the sticky trap. Press the code down, placing it next to the lure as shown.

NOTE: Baby or eucalyptus oil can help remove glue from your skin, if needed.

4. Open the MyPestGuide® Reporter app. Click on the (+) symbol in the top right-hand corner. Next, click the camera icon and take a photo of the whole unfolded trap with the code and lure clearly visible.

5. Fill in report details:

- **Location** – Check the location (GPS) button is green.
- **Send report to** – Select '**Pantry Blitz**'
Click 'Show More' to see all options listed alphabetically
- **Where** – type '**kitchen pantry**'
- **I Found** – type '**initial report**'.

6. Click on '**I am reporting a Location/Trap ID**' and press the [||||] icon to scan the barcode.

7. Assemble the trap using the fold lines and insert the tab into the slit as shown.

8. Place the assembled trap inside your pantry against a wall. Position the trap at least 10-30cm above the floor, away from damp or oily areas. Make sure the base is flat.

9. Using the MyPestGuide® Reporter app again, take two more photos - the trap placed on the shelf and the trap inside the pantry with the doors open showing the position of the trap.

10. Press '**Continue**', then enter:

- Your State (e.g. WA)
- Your registered email address (*IMPORTANT: Please use the same email address you registered with for the Pantry Blitz to make your reports*)
- Your personal mobile phone details in case we need to call you direct

11. Finally, press '**Send**' to submit.

Congratulations, you have completed your initial report. The next one is due in one week (7 days). Set up a reminder in your phone and keep these instructions handy.

Please follow steps 1-8 for making weekly reports. A reminder email will also be sent.

Making a report

1. Remove the trap from the pantry and carefully unfold it.
2. Open the MyPestGuide® Reporter app, click the  camera icon to take a photo of the unfolded trap. Make sure the whole trap is visible. If you find any pest(s), take up to three in-focus photos.
3. Fill in report details:
 - **Location** – Check the location (GPS) button is green.
 - **Send report to** – Select '**Pantry Blitz**' NB. Click 'Show More' to see options.
 - **Where** – type 'kitchen pantry'
 - **I Found** – type
 - No, if no pests were found.
 - Yes, with a clear description and number of pests found.

Note: Even if you do not find pests in your trap each week, please take photos and report to us. Reporting the absence of pests is an important part of the Pantry Blitz.
4. Click on '**I am reporting a Location/Trap**' and press the  icon to scan the barcode.
5. Press '**Continue**', check that (WA) is selected and your email and mobile phone details are correct, press '**Send**' to submit.
6. Return the trap to the same place in the pantry after submitting the report.
7. Please send in a report each week – for four weeks – report pest absences too!

Tips for taking good photos

1. Clean your camera lens before photographing and make sure photos are in focus.
2. Focus! Tap your phone screen to select the part of the image you would like to be in focus before hitting the shutter release button.
3. Get closer. Avoid using the digital zoom and don't use the camera flash!
4. Set the image resolution to as high as possible. You can crop the photo later.
5. Place trap in bright natural light to take a photo.
6. Use the rear, not the front camera! The rear camera provides better image quality.
