Subject: Dog Protection

I totally agree with the RSPCA recommendation in the three changes for dog protection..
Dog breeders are out of control money making scream..
Can't believe the government are so weak they allow shock collars on dogs..
I would like to see some government workers who make theses decisions confined to a small
space for many hours..
Hopefully the government shows some back bone and changes these law.. So our fur babies
have a better quality of life..
While your at it animals cruelty is rife and full punishment should be handled out to stop it.

Kind regards
Lou Stallard
